# Final Report: Self-Study Survey 2014

Lafayette Presbyterian Church
4220 Mahan Drive
Tallahassee, FL 32308

(850) 877-4428

Note: The comments that follow were sought to help provide context and a brief interpretation of this "snapshot" of our church, according to the 126 respondents to the 238 surveys distributed to all regular attendees, repeat visitors, members away from home, staff, and other appropriately interested parties.

Not all respondents answered every part of every question.

## Some comments from an elderly ecclesiastical mechanic.

A caveat: I am an old man and I speak out of the experience of my generation. My words must be viewed in the context of my cultural time and place. As such they may be virtually worthless as one faces the prospect of a new generation. Jim Monroe (The Rev. Dr. James Monroe, Honorably Retired)

The survey results are, I think, an accurate reading of who our people are and what they want in their church. Lafayette Presbyterian Church is an American old-line protestant congregation established more than half a century ago when the American culture, particularly the religious culture, was quite different from today. We have retained our identity over the years, and our values and visions remain much the same as in those years. I believe the survey document should be in the hands of our pastor nominating committee and shared with any prospective pastor.

Put much too harshly, we are like the Crawley family of Downton Abbey, but living in the England of Elizabeth II. Or we might say we are like John's Hardware or Albert's drugstore in the era of Wal-Mart and CVS.

And like the Crawley family, we are no longer on center stage. On center stage of American 21st century culture are the mega-churches and the myriad of "new element-type congregations that are springing up everywhere.

Quite frankly, I am, so to speak, a Crawley. I *like* the Downton Abbey lifestyle. I like the flow and dignity of Reformed worship, the intellectual stimulation and challenge of sound biblical preaching, and the awe of the worship in the house of God. I am not attracted to what appears to me to be (I am being very candid!)—the undignified exuberance, the self-actualization kind of preaching, the shallow theology, the fickle loyalty, the crass showmanship, of some congregations that are in the ascendant today.

But I am under no delusions about our place in 21<sup>st</sup> century American culture. Our "market," our mission field, for the most part, is not very receptive to what we are selling.

But, then, the church has always faced the challenge of preaching the gospel to a world that is "foreign." And it has always succeeded better when it learned to adapt to the culture rather than trying to eradicate the culture and/or replace it. To share the good news of God's love as demonstrated in the person and work of Jesus requires that we speak the language of the target people and give respect to their culture and way of life. The gospel has to be "translated," so to speak into a message that is understandable and attractive to the target audience. We have not been successful missionaries when we have totally rejected the culture. To reach out to people requires considerable adaptation. Any plan for the future must involve the element of change, not just improvement and perfection of what is, but adopting some different behavior.

So...the survey is a good picture of what is. But such a survey can never reveal what is to be or what ought to be. That prospect will be an act of the will. The future will be governed by visions, decisions, and deliberate plans.

The future will be effected by the leadership of the congregation. And the principle leader of the congregation will be the pastor. Pastors come in a wide variety of forms, but there are two overall patterns. One is the pastor, the shepherd, the counselor, the loving friend. She/he will "prop us up in our leaning places," and care for us old sheep until we die. We will love him/her and be loved in return. The other is the rancher, the leader, the prophet, the visionary, the pathfinder. This pastor will point the way and give inspiration to the people and generate courage to make some changes and reach out to others. A shepherd will care for us who are in the flock. But a visionary leader can bring a new vitality and strength to LPC.

LPC has many really wonderful assets. We have an excellent location; we have ample property which is meticulously kept; we have financial assets; we have many gifted people who are willing to participate. With a pastor who is visionary, theologically grounded, a good communicator, and energetic; indeed, one who can serve the Lord and the people with energy, intelligence, imagination, and love can help us give LPC a future of greatness.

Downton Abbey can adapt and find new life and play a key role in a twenty-first century England!
